National Institute of Physics and Nuclear Engineering  
Bucharest-Magurele, Romania

**Physics with small and large size facilities at  
IFIN-HH Bucharest-Magurele**

The “Horia Hulubei” National Institute for Physics and Nuclear Engineering (IFIN-HH) in Bucharest-Magurele is the prime research institute in Romania. With 12 departments, it combines the entire range of duties of a nuclear physics national laboratory with fundamental research in nuclear and particle physics and with applications based on atomic and nuclear techniques. After a brief presentation of the whole institute, past, present and future, I will concentrate on physics we do with small accelerators and other facilities, with emphasis on areas of environment and cultural heritage study and preservation.

**Donnerstag, 29. Oktober 2015, 16:30 Uhr**  
**1090 Wien, Währinger Str. 17, "Kavalierstrakt",**  
**1. Stock, Victor-Franz-Hess-Hörsaal**
